Learn the latest from expert scientists and managers from throughout the eastern US.

Poster abstracts are now being accepted.

Conference offerings

- Field tours
- 16 invited presentations
- Poster session
- Closing panel discussion
- Exhibitors
- Social activities

The goal of the Fire in Eastern Oak Forests Conference is to improve land stewardship through transfer of knowledge and technology of fire as a management tool. The conference brings together noted experts in research and management to present state-of-the-art information, perspectives, and syntheses on key issues and provides learning and networking opportunities to over 300 participants. This conference will emphasize topics relevant to management of oak and oak-pine forests and woodlands and should be of interest to managers, scientists, landowners, consultants, and students.
